To ensure our airplay charts more accurately reflect sector-wide engagement, our airplay charts maintain a cap on play counts per track per station each week. (25) While only a small number of tracks currently exceed this threshold, their disproportionate impact can skew the charts and misrepresent broader popularity across community radio. With this cap, a track will need support from multiple stations to chart, promoting a wider diversity of releases. **Tracks must be uploaded to amrap.org.au to qualify for the Airplay Charts.**
